

Infor Motion Query & Analysis

Overview

Do you wish you could access your business applications from devices that move with you to keep pace with your work style, and better yet, your lifestyle? With Infor™ Motion Query & Analysis, you can.

That's because this mobile application brings the familiar Query & Analysis ad hoc querying ethos to Apple®'s iPad®. You'll be able to use Query & Analysis on the move, at the airport, and in a board meeting or presentation, to access and analyze your business data in real time.

Feature focus

Infor Motion Query & Analysis redefines the way you interact with enterprise information, and provides revolutionary new features to increase the speed of your overall business. Because you can manage and secure your mobile applications from a single portal, the Infor Motion Application Manager, you'll be able to grow your business without making it more vulnerable.

You'll get:

- Access to your most critical information and operations from a device that never leaves your side.
- Touch-screen design and automatic query management, making your application intuitive and simple to use.
- Easier recall of your reports, since Motion Query & Analysis remembers your reports, through categories.
- An "offline" mode that lets you see your query results even when the server isn't available—an important feature in the mobility age, since network availability can hamper usage.

Key benefits

- Gain 24/7 access to your most critical information and operations.
- Get anytime/anywhere self-service reporting.
- Increase the speed of your overall business.
- Redefine the way you interact with enterprise information.
- Meet consumer-grade mobility expectations.

Intelligent screens that capture your business information and charts for ease in locating them when you need them.

- Quick, cloud-based deployment, and continuous innovation.
- Mobile application management to govern users, data, and features that fit your IT organization's way of business.
