

# Infor SunSystems

## Get new capabilities with Infor 10x

Extend the value of your Infor® solution and take advantage of technologies that can change the way you work with Infor 10x, the latest release of Infor's proven business applications. You get access to new capabilities in the areas of social business, mobility, analytics, and integration. You also benefit from major enhancements across Infor's core product lines, including Infor SunSystems.

## Experience the new Infor SunSystems

Improve decision making, respond proactively, and increase collaboration with the latest release of Infor SunSystems, which expands the core capabilities of this solution in a number of key ways, including:

- **A new modern user interface** that give users a familiar, easy-to-use environment designed to increase productivity, reduce training time, let employees easily find the information relevant to their jobs, and even have data delivered automatically to them. Once you experience it, you won't be able to imagine how you ever worked without it.
- **Expanded Infor ION integrations** that provide access to cross application workflows and event management, giving you foresight across application process flows, as well as proactive, preemptive control.

**Infor 10x represents the evolution of our technology platform, which features purpose-built middleware, as well as social, mobile, analytics, and cloud solutions.**

- **Access to Infor Ming.le™**, a comprehensive platform for social collaboration, business process improvement, and contextual analytics. You get the most innovative social collaboration technologies translated into a business environment and fully integrated across business processes. From collaborating alongside your Infor SunSystems solution to "following" people and objects, you'll solve problems and get work done in ways you never thought possible.
- **Infor Ming.le and in-context queries** with One View for BOD timeline. Provides clear, supporting insight and links to additional information at the direct point of decision, allowing enterprises to enhance collaboration, speed decision making, and better support grow strategies.
- **Drill-back capabilities from queries** and Infor Ming.le social feed that allow you to go back to the source transaction and take immediate action.

Increase the value of your solution and make the most of your maintenance investment by upgrading your Infor SunSystems solution.
